

COURSES AND CAREER OFFERED IN SPORTS AND PHYSICAL EDUCATION

In recent times sports have grown up as an exciting and rewarding career opportunity for many. And therefore now a day's people seek to get employed in this field. Sports career in India turned out to be one of the most prominent careers due to wide range of jobs being offered to students on numerous courses. Also job opportunities under sports careers in India are not limited to only athletics, as there are wide scopes for people in non athletics backgrounds too. I have observed that many of our medical aspirant students get depressed after failing to qualify NEET exam. Many of them proceed with zoology/botany honors but there are limited career opportunities in these areas many of them fail to secure a job there as well. As a physical education teacher I feel that with their abilities and academic background they can also do well in some sports related academic subjects such as exercise physiology, physiotherapy, nutrition, B.sc in sports science, Sports medicine, exercise bio chemistry, B.sc in sports coaching, B.sc in sports and recreation management, B.sc in physical education, health education and sports sciences, sports biomechanics, kinesiology, video analyst, sports injury and rehabilitation.

Professional sports also require many management personnel. But, there are limited numbers of students opting for sports management courses. Lots of tournaments like IPL, ISL, Commonwealth games, Olympics require management personnel. I feel that with their abilities, academic background and their interest they can do well in some sports related subjects such as B.A in sports management, BSM (bachelor in sports management) BBA in sports management, PG diploma in sports management, P.G diploma in sports tourism, sports

marketing, video editing, diploma in sports event management,

There are few options for humanities students also such as sports psychology, sports journalism, sports law, mass media and technology, pg diploma in adventure sports.
